

Hello my name is Nasser

I am an Accessible Information Designer

I support the creation, maintenance, and development of accessible resources that help our team, services, and users fully engage with the healthcare provided by NHS organizations. I collaborate with NHS partners to ensure our resources meet high standards of accessibility and best practice.

My responsibilities include ensuring legal and organizational compliance in managing our website and creating content that strengthens our online presence and brand. As the organization's Brand Guardian, I bring a strong understanding of both Trust and NHS national identity guidelines, ensuring a consistent and high-quality approach across all internal and external communications.

With my passion for visual communications, I provide expertise in graphic design and digital media production, including video, photography, animation, infographics, and data visualization, to deliver a comprehensive, engaging and impactful service.

We have a website with all our accessible resources on [www.learningdisabilityservice-leeds.nhs.uk/get-checked-out/](http://www.learningdisabilityservice-leeds.nhs.uk/get-checked-out/)

Please get in touch by emailing [getcheckedout.lypft@nhs.net](mailto:getcheckedout.lypft@nhs.net)
