

HPV Vaccine

What is it?

The HPV Vaccine protects you against getting HPV

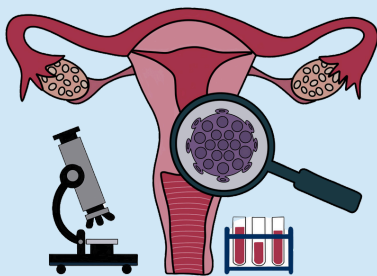

You will usually only need one dose

It helps your body understand how to get rid of HPV

Who can have it?

In the UK every child will now be offered it at school when they are 12 or 13

People under 25 can have it at their GP if they haven't had one before.

How does it help?

99.8% of cervical cancer is caused by HPV

Protecting yourself against HPV can stop you from getting cervical cancer in the future.
